What's SSCoop :S. Do you mean SSGM?

Edit: I THINK I got it working, but when I take the SSGM plugin example and build it- without adding anything I get the following error:

Quote:1>----- Build started: Project: Plugin, Configuration: Release Win32 -----

1>Linking...

1>fatal error C1047: The object or library file '.\tmp\scripts\date.obj' was created with an older compiler than other objects; rebuild old objects and libraries

1>LINK : fatal error LNK1257: code generation failed

1>Build log was saved at "file:///c:/Documents and Settings/my_name/Desktop/Plugin Example Source/Plugin Example Source/tmp/scripts/BuildLog.htm"

1>Plugin - 1 error(s), 0 warning(s)

===== Build: 0 succeeded, 1 failed, 0 up-to-date, 0 skipped =====
