Oblivion165 wrote on Sat, 28 July 2007 16:57I run under classic mode as well. (In regular XP, not MCE)  Not that I think its a major performance enhancer but I just don't like the "Bubbles". (MCE has a better looking default scheme than standard XP)You can get that theme and the Zune theme, which is the same as the MCE theme but's Black/Orange instead of Blue/Green, for Windows XP. IMO, the MCE theme is what the Windows XP theme should have been. I wasn't fond of the default Windows XP theme either, so I use the MCE theme.

I'm running Windows XP Pro SP2 BTW.
