I'm running a server on Hamachi. It can be marathon or a longer period (30-60 minute). Starting credit 99999. So you will never have to worry about your money again. Unlimited weapons and vehicles to buy. I have a fast internet connection, so the game will run smoothly. All you need to do is to download hamachi from:

<http://www.softpedia.com/get/Internet/File-Sharing/Hamachi.shtml>

After installation the programs icon will go to the right corner of the screen (at the clock). Open it (double click). You should see a simple silver application. In the right corner is a little triangle, click it. Then a tab will be viewable. Click on the "join an existing network", and type:

-Network Name: NoLimits!

-Password: play

It's online every day, according to GMT +1 time.

Exactly it is a virtual LAN. It's like if we would sit next too each other. Do you have a cracked (pirate) version? No Problem. Since it's LAN, nobody will see or check your serial number. Also don't worry about being hacked. Several firewalls are protecting my computer. I've just made this room for your enjoyment. Have fun!
