Screen Shots anyone? (Sorry about the Fraps FPS thing :\)

First up: Nod Base (Now with functioning harvester!)

KANE LIVES!:

Check out the Gree Tiberium Crystals:

Don't forget about the blue ones!:

The sun sets on the GDI base:

And now, for the first time publicly I introduce GDI's own custom Anti-Air Cannon!

Thats all I got for now. Hope you guys enjoy.

(Edit: In case your worried, the FPS meter on the bottom is inaccurate. The reading it shows is the reading it gets when I take a screen shot (Temporarily freezes game for half of a second)
