not gonna release the URL, but i know a palce WITH a working virus free aimbot...

BUT, for those who think a aimbot is fun and want one, heres what they do: it ruins the game for everyone, it gets you baned, kicked, hated, and called names over it. It is not worth the time or effort to use

I ahve used that AIM bot befor, and it does work, i had 130 kills in a single 5 minute DM. that was the first, last, and ONLY time I have used it. Dont PM me saying 'I wanna see!' for all I know you are wanting to use it to win and not see what it is...
