The wiki won't be down forever. I am on vacation in San Jose, CA. I'm only on my laptop and I really don't want to waste my time here cleaning up the stupid mess. I get home on Monday evening so I'll have plenty of time before bed to unpack, unwind, AND fix the wiki. Hopefully an upgrade will help fix some of the automated spam too.

What really irks me is that this seems to have been directed at ME and yet I only host it and help keep it clean from an admin level. The content and maintenance is done by the community so this person has attacked ALL of us rather than just me. He's also probably reading these posts and masturbating himself into a frenzy for the effect he's had.
