\*hits razor blade with a \*frozen\* large trout

yes yes there is.

but never the less that has been a community project for a long time. (This is just my new alias I was around a long time ago when it(Renegade) was first released.)

I'm kinda suprised who ever did it has not taken credit. He definitely seems stupid enough to.

and I know it wasn't "Hacked" but I was in lack of a better word right before I went to bed at 4 am in the morning..
