Ok, no music. It is just that when I didn't put music in some of my past maps, people complained and said there should be music in it.

Also if you don't like music just type in the console command "musica" and hit enter. It will play nothing, and shut turn off the music.

But don't worry, I won't put any music in.

But what I might do instead, in place of the music, I can put some more ambient sounds, and more weather sounds... like wind or something.
