Alright, I used to be a regular a while back on Renegade, Scrunched was my user name

My computer crashed, so I had to fix it

Anyways, I go to install Renegade, and the game is fine..

But when I install the update it asks me to download so I can play online, it says its 100% complete, and stays like that, nothing new shows up, it just stays like that unless I hit cancel, and when I do that, and Im updating from my desktop, it says one of the files couldnt be matched or whatever, and the update was a failure

Any help with this?
