Goes to show how much you know dumbass.

How about-

FF7 was made for playstation.

And it IS an anime in Japan.

So I declare you, ANIGAY

Just goes to show how much you know.

Eidos released a PC version of FF7, but then you are quite right, it was originally made for Playstation.

FF7 is not primarily an anime. It had one spin off anime episode. Therefore it is not primarily an anime.

Then there was the CG movie which rocked. Still not a conventional anime though.

FF7 is the greatest RPG game ever conceived. End of discussion.
