I seem te be missing some presets that i need to use.
This is in level edit i dont know where this problem came from cos on my other computer level edit
is working fine with all presets there.
Tho on this computer i seem to miss quite a few that makes my modding not possible.
I am using windows vista (for some people that might ask)
And so was my other computer on which it worked great.
And i am running the program in administrator status and in windows Xp.

Thanks in advance
