\# Copyright (c) 1993-1999 Microsoft Corp.
\#
\# This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
\#
\# This file contains the mappings of IP addresses to host names. Each
\# entry should be kept on an individual line. The IP address should
\# be placed in the first column followed by the corresponding host name.
\# The IP address and the host name should be separated by at least one
\# space.
\#
\# Additionally, comments (such as these) may be inserted on individual
\# lines or following the machine name denoted by a '#' symbol.
\#
\# For example:
\#
\#   102.54.94.97   rhino.acme.com   # source server
\#   38.25.63.10   x.acme.com   # x client host

127.0.0.1   localhost

EH hope this IS WHAT URTALKIN BOUT
