Wow this is really interesting. I'm running ubuntu off the CD right now.

Question, If i install ubuntu on a removable hard disk it's going to partition it. I have a 250 gig USB removable hard disk btw. Will i be able to view the content of the rest of the hard drive from ubuntu and will i be able to view the content of my internal HDD with windows on it?

edit I think i just answered my own question. Excuse my n00bness with Linux but this is friggin amazing.

New question, if i install ubuntu on a removable disk, what option do I use in boot setup?

Jamie
