## Subject: Requesting Server List... and then Operation Timed out
Posted by QuartzAw on Tue, 01 Jul 2003 04:09:42 GMT

It makes 3 weeks that my Renegade doesn't work for Multiplayer Internet games. I open my renegade, go on Multiplayer internet, Westwood, and I click on any option and it appears "Requesting server list" and then "operation timed out". I tryed also to go on Gamespy servers, but it shows 1 server with no one in!

I forgot to mention, I had no firewall, it makes only few days that I got a Router. I reinstalled Renegade and renegade internet components.. and I also was able to make a Renegade Dedicated server "FDS", but not anymore! -No MODS

Please help me, I'll be very very very happy if so.
