Stop posting, slow your arse down and actually read the posts and follow directions.

FOLLOW DIRECTIONS.

I don't want to see one more post from you until you have figured this out. There are plenty enough post from others that would fix this on any windows/vista computer.

FOLLOW DIRECTIONS.

Read very slowly.

FOLLOW DIRECTIONS.

Do each step as you read them. Don't try to do the steps after you read the entire post. You will forget steps!

FOLLOW DIRECTIONS.

If a program is broken or non-responsive and all else has failed follow the Oblivion Creed: Delete All, Reinstall.

FOLLOW DIRECTIONS.

Vista Sucks, deal with it via the Oblivion Creed and get back to a decent OS - Windows Xp Professional SP2

FOLLOW DIRECTIONS.

After every single renegade (in your case get rid of the entire first decade install) related file has been removed manually or by uninstaller, follow every single one of these steps after installation: http://www.renhelp.net/?mod=Content&action=view&id=Getting+Started

FOLLOW DIRECTIONS.

and follow directions.
