Dear Renegade Forum People,
I got the FDS yesturday thinking it would be easy. all i did was follow instructions on download, enter name i want, mode i picked GSA, speed of outbound stuff. then i went it change ALL the modes to GameSpy and put the ports and settings to the default. then went into ,y router settings and port forwarded those defaults. double clicked the Master Server.exe and it loaded good and stuff. "100 % Loaded, GSA Mode Active since etc. But i cant find it on GSA or WOL. Please Help me
