Well i need the files in .3ds format but my demo of 3dsmax 7 just expired D:

Slave or anyone, if you have 3dsmax is it possible if i post the .3dr files you can convert them to .3ds for me? you need 3d ripper DX to be able to import .3dr files. the rest I could edit in gmax because gmax can import .3ds, all i need is the juggernaught and predator tank, no terrain.
