The reason why he added the fonctionnality to launch other programs at the same time got me thinking and searching!

99,99 % sure this guy is noone else than Mandai. Look at dates: he releases teh cheat-version at 27/08, then 4 days later releases a non-cheat version. Both are programmed in same programming language.

IP and renegade serial(s), plz?

its meant to make using other people's names by direct connect easier

better than going through the logs yourself and picking a name, copying and pasting, starting rgh

if you are someone like me who always likes using other peoples names then this tool is great, it
