i just wanna see if any one has any funny stories from any cnc game, or stories of renegade noobs. ill start....

My funny story is from cnc generals zero hour. a friend of mine was playing some dude, and the dude was trash talking the whole while using all caps, and it was really annoying. he was abbreviating everything. my friend just said " watch this" a few minutes into the match..... he had 6 superweapon general particle cannons, and MANY aurora alpha bombers. when the dust cleared, the dude had only one arms dealer left. there was silence for a second... then "i hate you..."
