No i dont mean you are using an aimbot or wallhack, i'm being sracastic about surth, because I'm thinking of field, and all along it was all about seige, (my mistake) so my perception of where he was standing to shoot a tech (you know arty camping on gdi bunkerhill) a tech could easily hide behind and nearly impossible to kill the technician because from the tunnel/waternal the tech isnt visible, thats why I was joking saying wallhack and aimbot, I wasnt accusing you of using them.

And after you posted SS's it does seem more clear now, but I guess from one post someone was speaking of field, so I thought we moved into talking about field and not seige.
