buy new computers.

sorry i seem to spend my money on decent things (E.G) clothes, shoes, haircut, friday nights not a new computer, mouse, keyboard. Like you.

Just make it legal? it woulent be an advantage if every 1 could use it. So no being dumb plx.

This coming from a guy who spent time delving into a computer game, and did coding to modify it.

I have no opinion on this tweak of yours, but I love the 'I'm too cool to buy a new computer' attitude.

Real doesn't even know anything about coding. The "tweak" isn't even his and has nothing to do with coding. Nice try flaming him though.

I'm guessing that if you ask for something to be allowed by RenGuard, then you obviously have enough spare money to go and buy a new computer! I mean, c'mon, who doesn't buy a new computer just so they can play Renegade with less fps drops?
