And dont tell mee to go buy a new computer when i aint even got a job yet.
Heres the thing

Dont use rengaurd if your gonna hate on the creators and call them nerds, they wont take anything and make it compatible, and we cant help if you cant buy a new computer, that just means your a kid, thus, play renegade without rengaurd, and use this mod then, I use tons of mods rengaurd wouldnt let me play renegade with, but their just beta models such as the backpack mod, cigar mod, beta pistol mod, bandana mod, weapon factory shunt mod, and beta under mod, and because of all these w3d files I have, I cant use rengaurd, So i decided not to use it, if you want to use something that isnt compatible with rengaurd, then just dont use rengaurd.

Oh and by the way, rengaurd does make renegade more fun, it stops n00b haxz0rs so we dont have to worry about testing everyone.

Oh and if you are old enough to get a job, please do so, if your 16+ and dont have a job, that means your lazy, I walk home and to work everyday after my feet hurt, and I enjoy doing so even with soar feet, so please dont be lazy and
