Ages ago i donwloaded the fds with cloudyserv it worked perfectly. It wasn't needed so i just left it alone.

A couple of months on and i've decided i want to run it again, i load it up and for some reason it keeps restarting. I uninstall EVERYTHING to do with the serv, including cloudy.

I reinstall the fds along with NR and SSGM, configure it all properly (With NO extra files) load it up, and keeps restarting...

[16:15:49] *** Auto starting game. Type 'quit' to abort ***
[16:15:49] Initializing Westwood Online Mode
[16:15:50] Got server list
[16:15:51] Got server pings
[16:15:51] Logging onto European Server
[16:15:51] Logged on OK
[16:15:51] Applying server settings
[16:15:52] Creating game channel...
[16:15:52] Channel created OK
[16:15:52] Server Side Game Manager v2.0.2 with Scripts.dll v3.4.1 loaded
[16:15:52] Created by Black-Cell.net
[16:15:52] FDS DDE channel initialized
[16:15:52] Loading level C&C_Field.mix
[16:15:54] *** Auto starting game. Type 'quit' to abort ***
[16:15:54] Initializing Westwood Online Mode
[16:15:54] Got server list

And so on. So i tried reinstalling again, and i still have the same problem. I am not aware of anything that might of changed. I have uninstalled even Renegade, i've tried extras. i've checked it's not my firewall by disabling it, i checked its not WOL, WOLSPY or Gamespy. From what it looks it's not the bot either, so i have no more ideas.

Sorry for babbling on, but i hope it saves questions.
