Well I can handle the chick part, but not the gay part, since i'm not gay, but then to the main public who see me riding, some would think the vespa looks stupid, while if i rode the vento, they'd say it was kinda cool. So I'm stuck, i might go see the vento i posted, they claim it's made in the USA, if it's made in china i'm sticking with the vespa then, because I know the vespa is well...umm european mean.
