I'm not desperate for anything that drives, i just have a thing for vespas, i am old enough to drive or ride a motorcycle, but i prefer vespa mopeds, and they arent really weak, 150cc will speed up to 60mph quickly, people owning bikes 600cc and over just want engine noise and higher power, it's like a toyota yaris vs mustang, they both drive fast, but the mustang is just fasterrrr
