for a few tips, in cnc3 expand your base, expanding is good because you can have a secret base+harvest more tiberium, most maps have 4-6 tib spots even if it is 2 player or 4 player, oh and some other tips I use to cheat I won't tell, they aren't really hacks or anything, but I play dirty lol, I don't allow people to use superweapons as it seems nub to have a nuke hit you without being able to stop it, I think all attacks should be stoppable somehow, if it's a nod tiberium vapor bomb, I mean it takes out like 2-3 buildings, that's ok, but I hate it when a super weapon takes out half your base without warning.

Oh and my dirty tactics, let's just say I can shoot anything anywhere, with a certain unit from my base, like b2b on renegade, but ALLOWED in cnc3 because of the special ability. I take out nubs with it, but my friend FRISH can easily stop me, he's too much of a pro in cnc3, I'm poor making refs and mamies, he comes rushing with a mass and owns every tib spot in the game...

Earlier when I wanted to play you, but then played him, we were sorta tied, I was about to own with cheap tactics, and then his game crashed somehow, sometimes cnc3 randomly crashes when playing online for people, so it said I wonbut in the end I bet he would have, he kept massing venoms.
