egg098 wrote on Sat, 22 September 2007 08:02 Anyone who doesn't speak the same as you do has a French accent. Listen to a French person speaking English - they speak with an accent.

Regionally they're really diverse, like kytten(hello) said back there - the UK is probably one of the most diverse places accent-wise in the world.

I dunno about that. America has the hick accent, the normal sounding accent, the northerly accent, the hispanic trying to speak english accent, the asian trying to speak english accent, and then the way the african americans speak it.
