Ya, but he was the commando of the game, the commando's in cnc3 are good too, bu their more for infantry killing and building, they dont do too good against vehicles, maybe weak ones, but not something like a scorpion tank, they would get owned. Plus now we have trooper squads, you can mass 10-20 of them and own anything except air. I think shock troopers are the best, they can teleport, and attack ground/air with alot of power.
