Said team would like to make a more official statement:

Renegaid's can be safely protected against by bouts of fresh air, sanity (having other, sane individuals assists your sanity) and not exposing one's self to extended, often downright idiotic, threads on Renforums.

The Ignore button is the best method to allow yourself longer browsing times without risk of contracting the disease

If you find yourself exhibiting these symptoms. TAKE A BREAK!

Renegaid's can kill.
