According to a job listing on the official EA website, the EALA division, in charge of MOH and C&C franchises, is looking for a "sound designer who will work closely with the audio director on creating sound effects, dialog, and music for a next-generation first person shooter game," based on a "widely recognized leading sci-fi franchise." Sequel to C&C Renegade finally back on track ?

UPDATEIn the meantime EA has removed "sci-fi" from the listing...
