If someone finds a way to prevent the sniper scope modification, I'm sure plenty of us will be glad to install whatever needs to be installed server-side. However, the benefit of this mod isn't that great so it's hard to tell when it's being used.

Ty ranted and raved about snipegod1 but he's not THAT great (no offense)... if he had a headshot clickbot he wouldn't be using Havoc instead of Deadeye, first of all, and second of all once I sniped where he sniped on the Pits and got over twice as many kills as he did. And I'm not that great a sniper. Explain that.
