I found that nod has the best rushes. Here are a couple.

1. Get an sniper, to scope out and cover you. Then take in APCs with the person of your choice(not engennier). Place beacon. Use APCs to cover the beacon. This works better when their tank building is destroyed.

2. Flame tank rush. Take two people in each tank. When you to their base,one get out and place mines all over and kill everyone. The flame tanks should cover the outside. If this works the flame tank should be helping kill the building. If not, thats why u lay mines in the building. Just in case soliers come in.

3.THIS ONE ONLY WORKS WHEN THERE IS A LEVEL WITH STAIRS LEADING TO THE TOP OF EACH BUILDING. Take a plane or APC. Get an engeneer. Fly to the top of their building. Lay mines. Place beacon. HINT: If your plane is loosing health, stay down. If it blows up in mid air you will die.

If u have any problems plz speak about it in the next columes.

TY
