Well EA did do some justice on CNC3, they stayed with the flow of the story, answered some old questions, created some new ones and started a new twist.

Because they know how dedicated the CNC community is one would hope they would put the same consideration into another FPS for the series, I do hope however they do make it for Red Alert and not Red Alert 2... or take a total jump in a different Direction Red Alert 3 but not as a RTS, you jump straight in as a 60 year old Tanya, HAHA im kidding...
