Subject: What the hell happened to my level edit?
Posted by General Havoc on Wed, 05 Mar 2003 10:30:55 GMT

Have you tried making things in a new mod folder? Anyway go to westwood.ea.com click the link for the FTP server then browse to the renegade directory. It should be called toolsinstaller2.exe, this contains RenX gamepack, Level Edit and the W3d viewer. Make sure you uninstall first, there named "the renegade mod tools" on the uninstall list.

Hope this helps
