That was the Command & Conquer Collection (Red box with 5 games, technically three and two expansions), and I have it. That's what got me into Renegade. I only bought that collection because I wanted Red Alert 2, which was no longer being sold. Now I'm into Renegade more than anything else, my brother got into it (barely plays anymore), my friend plays with me when he is over, and he got this girl he knows to buy it (probably TFD) for Renegade. So hopefully...

I never got TFD, and I never got C&C3 yet either, so I won't pass on this. It saves from having to buy TFD and C&C3 plus it's expansion, but I agree, they should wait until the expansion for C&C3 is out and add that.
