For this havoc-wallpaper you need:

- Gmax/RenX (for changing Havocs Pose)
- w3d-Importer Script for RenX and Max9
- 3ds Max 9 (for rendering)
- RenegadeEx (for extracting Autorifle .w3d + texture)
- Sgtmay's Animatable Havoc
- Crazybump (create normalmaps quickly for havoc and Autorifle)
- Photoshop

Thats all I think? Maybe I write a tutorial. Dunno. I have a lot of other stuff to do....
