It doesn't matter how many FDS's is running on a server unless the dedicated server can support that many.

My box can support around 10+ FDS's with like 10 people in them (around.)

Single Processor Quad Core Xeon 5345 - 2.33GHz (Clovertown) - 1 x 8MB cache  
4 GB FB-DIMM Registered 533/667  
SATA Raptor 10k  
1000 Mbps Public & Private Networking  
Windows Server 2003 Standard R2 SP2 (32 bit)
