There not going to be server sided as my FDS is still not working...it says "Failed to create game channel" forever after a certain stage! Please i am a newcomer to GMAX and all other programs except levelEDIT, so i ask you to be quite thorough in your reply's when telling me how and what to do...

All i wanna do for the meantime is actually "Make the door in GMAX" so im gonna be needing a pretty good tutorial on how to do that...
