I am still facing the problem. Now, the crah dump is not created. Just a message saying
Renegade not working (Vista message). I noticed that a sysinfo file is created at that time. Not
sure it would help..i am quite puzzled and frustrated by this. Pls help.

Another interesting file called bandtest created which says

BandTest: Detecting my IP
BandTest: Failed to get response to IP detect ping

The timestamp for this file is 12 mins before crash.
