Nah, Renegade never really died, its a way to fun game for that.
If i could i would play renegade every day but i can't cuz my own comp is crashed, trashed, bumped, infected, overload and a lot more...
Modern age... :rolleyes:
I can Play it everi day

Well I used to, but now, I have too much lagg for the game to be fun
Damm If I could just upgrade my computer..... 5 average FPS sucks(I have that all the time)!!
How much avreage FPS do you get?

I get around 70-75 FPS .

But I know where you're coming from. I used to play the game on a laptop which gave me about 5-10 FPS, it was hella hard but I was still MVP most of the time.

Yep looks like your computer is a real POS! I get 30 in most games and I have a Geforce 3 Ti 500! LOL.
