I have AMD 64 x 2 Dual Core Processor 4400

Nvidia Geforece Overclocked 8600

12048 MG of RAM (10 GB of Readybost RAM which helped a ton, on level 12a of Renhalo I was getting 31-20 FPS, now the lowest I get is 80 (screen is locked at 80))

320 GB Hard Drive

And other stuff that I am to board to type about right now.
