Obviously the file wasn't from game-maps. if it was a virus, my download must have been hijacked.
Restarted. File isn't there. Even in DOS prompt the dir command doesn't show it. If i had a floppy drive i would re-boot in DOS and try.
I Even tried deleting it in dos with a wildcard (*.exe) but it said it wasn't there.
Ran nod32 (anti virus) nothing comes up.
