---

This is very annoying, yesterday everything was fine, I had 150 average ping on Renegade, but when i wake up this morning and started up renegade, i could see a ping of +500 no matter in what server i played. I think it has something to do with the router, because I also have renegade on a other pc in this house, where I also had 500 ping. I tried restarting the modem but i didnt get any good results

It would be great if someone could help me with this, thanks
