i couldnt pm you for some strange reason, but here you go:

The basics of w3d replacing is to have some knowlege of it and devotion to do it. It may be difficult to do at first but here is some tools, g max and the exporter with is included in this tool package. Also download this registration workaround for g max.

Install the applications in this order:

 g max
 registration workaround
 tool package

I recommend this site: Renhelp for the tutorials.
