o nice tuna but i havent msn (dont want buy new pc if windows crashed again after this damn msn install....)

lets pm? you give overheads i give you code to flash? also i enable "bullet' icon flashing when you firing tuning :PPP

I already have code to make the health/armor bars/numbers flash and anything else I want to flash as well. I was just curious how you managed to do it since you don't know how to edit shaders.dll.
