Find the

[Scale_CNCVehicleMedium]
and
[Scale_CNCVehicleHeavy]

sections and either change the Shell value from 0.5000 to something higher (increasing scale = increasing damage), but this will also make it take more damage from other tank shells and lots of other weapons. Alternatively change the Explosive value from 0.3000 to something higher, but this will make all rockets, C4 and other explosive weapons also do much more damage.

Because apache / orca rockets do not have their own individual entries in armour.ini you can't change their damage scales without also affecting the damage done by lots of other weapons.
