I have some problems with the Ranks Plugin on my server.

The problem morein lies with getting the plugin to update to the web via FTP.

The options are there in the XML file but do they actualy work?

The plugin never actually sends anything to the web, or at least not that I can tell.

I currently have the following settings:

```
<!-- Path to where you want your filename.htm file(s) to be output.
This path will NOT be checked by the plugin, so make sure its correct. -->
<cvar name="sitePath" value="C:\Westwood\RenegadeFDS5\Server\BRenBot\ranks"/>
<!-- Output type. Set to 1 for ranks.txt output (for the PHP scripts), 2 for
the old style .htm file output, or 3 for both -->
<cvar name="siteOutputType" value="2"/>

<!-- DEBUG MODE - ONLY ENABLE IF YOU HAVE PROBLEMS -->
<cvar name="DEBUG" value="0"/>

<!-- FTP SETTINGS -->
<cvar name="enableFTP" value="1"/>
<!-- FTP Server -->
<cvar name="ftpServer" value="ftp.*****.com"/>
<!-- Username -->
<cvar name="ftpUsername" value="*****"/>
<!-- Password -->
<cvar name="ftpPassword" value="*****"/>
<!-- Path to place uploaded files
Must start with /, but does not need a / on the end -->
<cvar name="ftpPath" value="/public_html/renegade/aowladder"/>
```

Any help would be appreciated.
