I will not say if an aimbot exists or not, but your stoy is flawed.

1. I have seen many people with 100+ kill games since Renegade came out. I believe Java was one.

2. You are basically saying that if a person has a K/D 36/6 or better they may have an aimbot. Well, then that means r3ctum, TrueADM, fr0chin and about 100 others have an aimbot. Those players averaged 45 kills on my sniper server. In a 30 minute time frame (more than 1 kill a minute)

Look at the size of the server you were playing on. It was a large game. On large servers I would only average 10 deaths. I die more on the smaller games because there are fewer targets. So unless you have a way to prove these people have aimbots, don't complian everytime you get your ass handed to you on a platter. :rolleyes:
