few reasons :

1. not compatible with rxd because rxd files are different from full version files
2. gives rxd complete freedom in what can be achieved with anticheat.
3. no overhead of communicating with regard network. The bot handles everything on server side.
4. updatable anytime we want via rxd update feature (in development)
5. there are some hacks out there to bypass u know wat therefore we dont feel comfortable using it.
6. to prove it can be done
7. learn how anticheat works
8. just for fun
