lol after reading the bold paragraphs/sentences, that just shows to you the monkeys are being forced down 30 joints a day? Columbian strength? Hmm, Chronic has (as they say on some websites) 17-23% THC.. Columbian strength (again) really has no meaning, but 30 joints a day? I'm sorry, I can't even smoke that much. It may add up to 30 joints in about, a week and half? 2 weeks? Excluding bong/pipes..

Eh i g2g but ill continue this shit later

anyway monkeys have smaller brains too, lol scientific fact i guess but shit

yes, i like to play donkey kong 64 with my friends
